(54) RETRIEVAL PROCESSING METHOD AND PROGRAM

(57)Abstract:

PROBLEM TO BE SOLVED: To allow a retriever to intuitively analyze a retrieval result.

SOLUTION: A plurality of document data extracted by retrieval are presented to a user in first display configurations as the next processing key and selectable display items, and according to the selection of the display item by the user, the document data corresponding to the selected display item are presented to the user in second display configurations designated by the user as the next processing key and selectable display items. Therefore, it is possible to change an object to be analyzed and display configurations by an intuitive interface, and to advance analysis.

LEGAL STATUS

[Date of request for examination]

26.07.2004

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
